

MEDICAL DEVICE OEM CONTINUOUS GLUCOSE MONITORING SYSTEM

AVIENT SOLUTION

Mevopur™ Pre-color Formulation

WHY AVIENT?

- Offered support for processing under low pressure conditions and at every stage of manufacturing
- Performed extensive R&D work to consistently deliver the customer's color target of a hard-to-achieve light gray
- Effectively addressed all material challenges and sensitivities
- Provided regular 'summaries of understanding' to keep up with changing forecasts and ordering patterns

LEARN MORE

KEY REQUIREMENTS

- Adapt to strict processing requirements of a secondary operation put in place to manufacture a new device model
- Meet material size and thickness requirements while achieving desired color target
- Overcome material unpredictability and sensitivity to heat, light and moisture
- Minimize impact of supply chain instability and changes
